DETAILED ACTION

1. This action is responsive to the Applicant's Amendment filed on May 2, 2005.
2. Claims 4 – 12 are allowed, while claims 1 – 3 have been cancelled.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance:

Prior art of record, taken either singly and/or in combination, does not teach or disclose a system as recited in independent claim 4, an apparatus as recited in independent claim 10, a method as recited in independent claim 11 or a computer program product as recited in independent claim 12 with the following feature:

Programming a parameter by converting a drawing having x-coordinates and y-coordinates. *Determining the value of the parameter from a drawing stroke thickness and/or color at a certain point of time corresponding to the x-coordinate.*

The closest prior art is Racine, U.S. Patent 4,811,243, which discloses digitizing drawings and calculating parameters from x and y coordinates, but it does not disclose determining a parameter value from a drawing stroke thickness or color at a certain point of time on the x-coordinate; and Fleck, U.S. Patent 6,259,438, which discloses a digitizing system wherein a user manipulates a stylus for use in a coordinate input system, the degree of rotation of a finger wheel by the user determines the extent to which a chosen graphical parameter (e.g. line

thickness, color, shading, gray scale, etc.) is varied, however, the parameter is not set by the thickness or color of the stroke made by the user, rather the thickness and color are determined by the parameter.

Thus all remaining dependent claims 5 – 9 are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
